

## Description

This machine is a semi-automatic ladder production machinery. Flexible solution when required a quick and simple rung pitch and width adjustment.

## Benefits

- High output quality
- Continuous operation
- Flexibility
- Productivity increase
- Ergonomic equipment
- Safety

## Features

- Integrated solution for ladder production
- Conveyor for ladder pre-assembly
- Rung expanding
- Rung orbital riveting
- Automatic ladder advance
- Conveyor for ladder exit

## Technical data

- Profile section: 50x20x1.2 up to 90x30x1.5
- Profile length: 1000 up to 6000 mm
- Working cycle time 7 seconds per rung
- Ladder width (mm): Adjustable from 300 to 500 mm
- Rung pitch (mm): Fixed pitch of 250, 280 and 300 mm
- Hydraulic pressure: 160 bar
- Pneumatic pressure: 6 bar
- Dimensions: 11000(L) x 2100(W) x 1600(H)
